### Arts & Crafts

Clean design, minimal decorative elements, linear design, natural colors, emphasis on natural elements, careful hand-crafting.

### Cottage

Eclectic, mix of elements, well used and loved feeling, staggered heights, broken lines, multiple finish colors to make pieces look stand-alone.

### Georgian

Refined, geometric design, balanced elements, columns and vertical emphasis, simple linear detail, traditional Americana and Classical decorative elements and colors.

### Old World

Heavy dark elements, detailed carving, dominant scale, aged finishes, rich dark colors, intricate carvings, mixing of materials from wood to metal to plaster, aged finish even when new.

### Shaker Inspired

Clean lines, simplicity, minimal detailing, painted and natural wood finishes, handcrafted feel, typical colors include brick red, mustard, blue and cream.

### Contemporary/Asian

Uncluttered, clean lines. Groupings of cabinetry in similar heights, blends of materials, form and function first priority.

### French

Delicate scale, curved flowing lines, separation of cabinetry elements to create a feeling of stand-alone furniture pieces, softer colors, elegant, feminine decorative elements.

### Nature

Bring the outdoors inside, colors and elements of nature represented, uncomplicated design, natural finishes, a place to retreat.

### Rustic Retreat

Comfortable lodge feeling, rustic wood species, colors of nature both vibrant and neutral, comfort over design or function, elements of nature as decorative elements.

### Tuscany

Emphasis on hearth area, staggered cabinet heights, simpler door styles. Decorative cabinetry elements add weight and focus. Sunny colors. Decorative accessories include pottery, metals, terra cotta, baskets.

# drawing your floor plan

We want to design your project accurately from the beginning. You can help us by providing a floor plan. Using the grid on page 6, indicate your floor plan and record the following dimensions and the location of doors, windows and appliances.

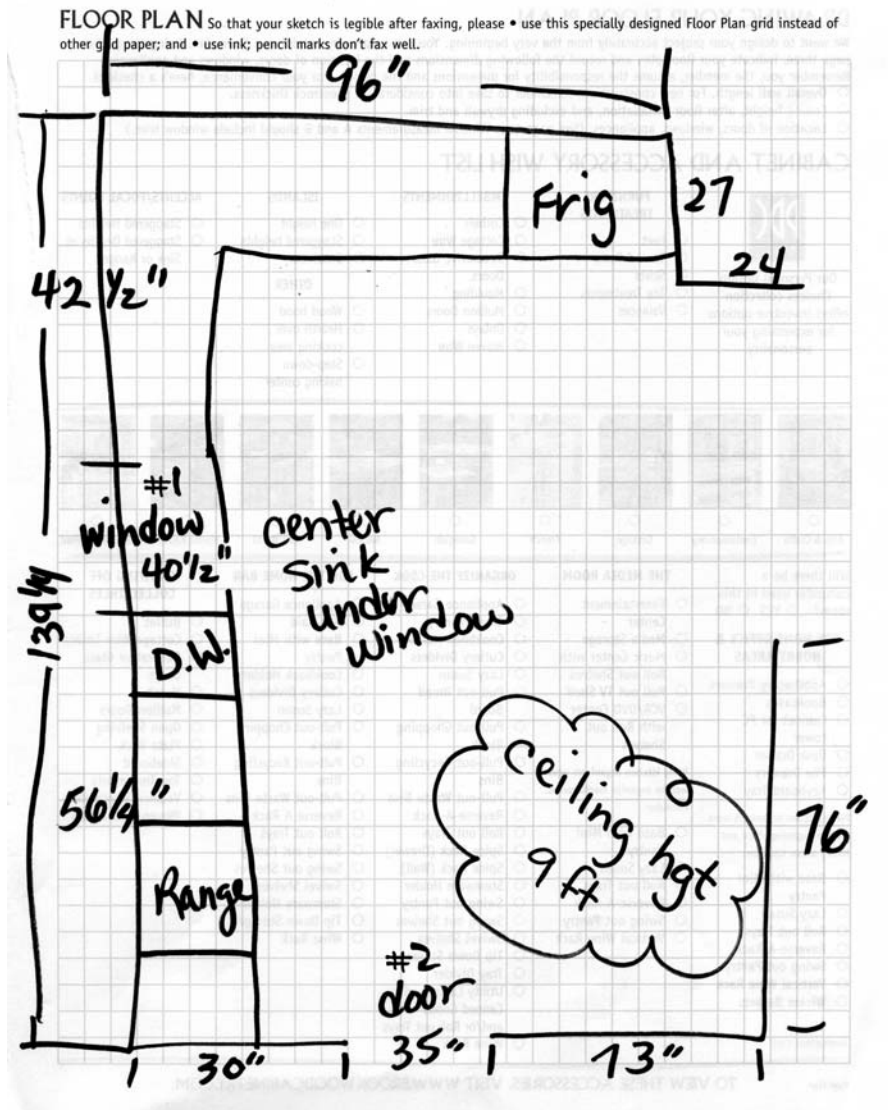

## FLOOR PLAN INFORMATION

- Begin by roughly drawing the shape of your room on a plain sheet of paper or a copy of the grid on page 6. Add doors, windows, breaks in the wall and all obstructions. Indicate in which direction doors swing and where they lead. Note utility connections, ducts, outlets, lighting fixtures vents and radiators. Record all details in inches on your rough drawing. (see example below)

- Start in one corner of the room, select a wall, and measure the distance in inches, of every item on that wall from the corner. Write all measurements on your sketch. (see example below)
- Continue to measure all around the room until everything is located, measured and marked on your sketch.
- Indicate the overall length of walls, height of the walls and the distance of everything from the floor—like outlets, light switches, ledges and soffits. For new construction, remember to take into consideration sheetrock thickness.
- Check that you correctly measured your room by adding your measurements for each wall and comparing them to the opposite wall.
- Include dimensions of islands or peninsulas.

## TRANSFER YOUR INFORMATION

- Using the grid on page 6, transfer the information from your sketch. Use the example below as a guide as to what dimensions are necessary to complete your design. Cross check your layout with your measured sketch.

So that your sketch is legible after faxing, please use this specially designed floor plan grid instead of other grid paper; and use ink; pencil marks don't fax well.
